

TAKE CONTROL
OVER THE
VENTILATION

**”I just checked the temperature at
our summer house
– from home.”**

Enervent eWind App

TAKE CONTROL OVER YOUR VENTILATION UNIT

With the Enervent eWind App you can control your Enervent eWind ventilation unit equipped with WiFi module directly from your phone. You can control your unit locally without an internet connection or remotely via the web.

YOU ARE ALWAYS IN CONTROL

With the Enervent eWind App you can control your ventilation unit directly from your phone. You do not need to enter the technical room, or use the wall-mounted control panel. With the easy-to-use app, you quickly select the right operating mode, anytime, anywhere.

MORE INFORMATION ABOUT THE AIR QUALITY

What is the optimal indoor temperature?
Is the humidity okay? The application gives
you all the information you need when you
want to know it.

SERVICE REMINDERS WHEN THE TIME IS RIGHT

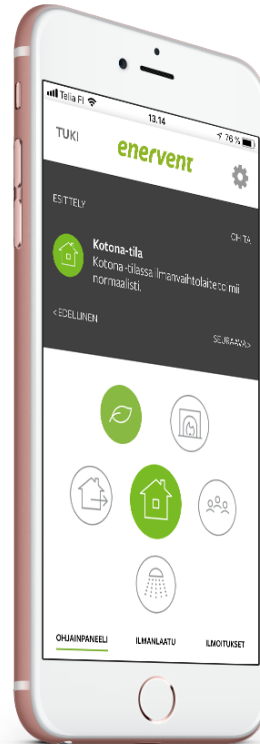

We understand that it is not always easy to remember everything that concerns the maintenance of the ventilation. Now you can let the app remember for you. When it's time to change filters or air quality requires action, the app sends a message.

Works via wifi, either on the internal network or via the Internet

Several users can control the same unit

Pre-programmed operating modes based on real use situations

Support menu, service reminders and air quality notes as messages to your phone

Android and iOS compatible

Follow-up of air quality and temperatures

” I can't even remember when I was in the technical room.”

All ventilation settings are handled via the phone.

**Download the Enervent eWind
App and take control of your
ventilation unit.**

Compatibel with all eWind units:

**PINION | SALLA | NEO | PINGVIN XL | PANDION | PELICAN | PEGASOS
| ALTA | LTR-3 | LTR-4 | LTR-6 | LTR-7**

The wifi module also fits old eWind units.
