

Automation upgrade

LTR-6 ECC -> eAir

NOTE!

If the unit has EBM 300W fans installed,
the new fans will deliver about -25% less airflow compared to the old fans.

Warning!

According to regulations, an ordinary electricity consumer is only allowed to perform some minor service tasks.

**According to Finnish regulations,
a list of the allowed tasks can be found at the Tukes home page (www.tukes.fi).**

Always make sure that the power supply is turned off before opening the service door.

Wait two minutes before beginning the maintenance work. The fans rotate for some time by themselves, and the heating element may be hot even if the power supply of the ventilation unit is switched off. Electrical housing may be opened only by a trained electrician.

Electrical installations must comply with local regulations.

**Continuously check and compare the electrical diagrams at the end
of this instruction as the upgrade progresses!**

Table of contents

Upgrade.....3

Electrical diagrams ECC30

Electrical diagrams eAir32

Parts list eAir E.....36

Notes37

Remove **the service door (1)** by releasing the locks.

Cut **the power to the unit (2)** (and other power supplies if available).

Remove **the cover from the electrical box (3)**.

NOTE! Ensure that no voltage is occurring in the electrical box before proceeding!

Remove **the filters (1)** by pulling.

Disconnect **the fan connectors (2)**.

Disconnect **the HRW connector (3)**.

Remove **the HRW (4)** by pulling.

Remove **the fans (1)** by releasing **the screws (2)**.

Remove **the main switch (1)** by pressing **the clips (2)**.
Disconnect **the wires (3)** from the main switch.

Disconnect **the power wires (4)**.
Disconnect and remove **the main switch wires (5)**.

Disconnect **all ground wires (1)** from the ground point.

Disconnect the main power wires from **the terminals (2)**.

Disconnect **the wires (3)**.

Disconnect **the connector (4)**.

Disconnect **the sensors (3)**.

Disconnect **the connector (4)**.

Disconnect **the display cable (5)**.

If there are wires connected **here (1)**, mark them according to the reading on the main board and disconnect.

Remove the screws and the automation base, incl. terminals, main board and **transformer (2)**.

Remove **the supply air sensor (1)**.
Ignore if no after heater installed.

Remove **the supply air fan cable (2)**.

Remove **the HRW supply air sensor (3)**.

Remove **the after heater and the cables (1)** by pulling.
Ignore if no after heater installed.

Release **the outside air sensor (2)**.

Remove **the cable sealings (3)**.

Attach **the new sensors (2400mm, 1700mm)**
(1) (40029170, 40029167)
to **the old sensors (2)** with strong tape.

Mark the new sensors in both ends:
"TE01" (**outside air**) (40029170)
"TE32" (**waste air**) (40029167)

Remove **the cable sealings (1)**.

Install **the new sensor connectors**
(40029170, 40029167) **into the electrical box (2)**.

Install **new cable sealings (3)** (40030100).

Install **new cable sealings (3)** (40030100).

Attach the sensors to **the frame (4)** with **cable ties** (40030997).

Install **the new HRW supply air sensor (850mm) (5)** (40029165).

Mark the sensor:
"TE05" (HRW supply air)

Install **the new supply air sensor (2400mm) (4)** (40029170).

Mark the sensor:
"TE10" (supply air)

Remove **the cable sealing (1)**.

Cut **the old HRW cable (3)**.

Install **a new cable sealing (40029244)**
to the new HRW cable (2) (40033952).

Attach **the new HRW cable (2)**
(40033952) to **the old HRW cable (3)**
with strong tape.

Remove **the cable sealing (1)**.

Install **the new HRW cable (40033952) into the electrical box (2)**.

Install **a new cable sealing (1) (40029244)**.

Remove **the cable sealing (1)**.

Cut **the old extract air fan cable (3)**.

Install **a new cable sealing (40029244) to the new extract air fan cables (2) (40028803, 40028802)**.

Attach **the new extract air fan cables (2) (40028803, 40028802)**
to **the old extract air fan cable (3)** with strong tape.

Remove **the cable sealing (1)**.

Install **the new extract air fan cables (2)** (40028803, 40028802) **into the electrical box (2)**.

Install **a new cable sealing (1)** (40029244).

New cables installed.

Install **the new supply air fan cables (1)** (40028803, 40028802).

Install **the new electrical after heater (2)** (10023275) and install the cables in the electrical box. *Ignore if no after heater installed.*

Drill a new 15mm hole in the corner of the electrical box and install **the new extract air sensor (3)** (40029224) with **a cable sealing** (40030100) in the extract air chamber.

Install **the new automation** in the electrical box.

Make sure no installed cable / sensor get stuck behind the automation base and that they are available in front of the main board.

Attach **the automation base** (40029740) to the electrical box with **four self tapping screws (1)** (40031530).

Connect **the main power cable to the terminals (1).**

L: Brown
PE: Green/yellow
 N: Blue

Connect **all ground wires** to **the automation base ground point (2).**
Supply air fan, extract air fan, (after heater), HRW.
 Tighten with **the nut (40031489).**

Connect **the blue wire** from the electrical after heater to **the blue "2" connection terminal (2)**.
Ignore if no after heater installed.

Connect **the brown wire** from the electrical after heater to **"DO2" (2)**.
Ignore if no after heater installed.

Connect **the wires marked "1"** in the fan power cables (40028803) to **"DO1" (1)**.

Connect **the wires marked "2"** in the fan power cables (40028803) to **the blue "2" connection terminal (2)**.

Connect **the extract air sensor (3)** (40029224) to the main board (X29).

Connect **the sensors (1)** to the main board according to the markings.

- X1, TE01: Outside air (40029170)
- X2, TE05: HRW supply air (40029165)
- X3, TE10: Supply air (40029170)
- X4, TE32: Waste air (40029167)

Connect **the wires from the supply air fan control cable (2)** (40028802) to the main board.

1: Brown

2: Black

3: Gray

Connect **the wires from the extract air fan control cable (3)** (40028802) to the main board.

4: Brown

5: Black

6: Gray

Connect **the wires from the HRW cable** (40033952) **to the HRW control board (1)**.

1: Yellow

2: Red

3: Blue

4: White

5: Black

6: Brown

7: Green

8: Orange

Connect **the after heater control cable (5)** to the main board (X17).

Ignore if no after heater installed.

Connect other components according to the electrical diagrams (pages 32-35).

Connect the pairs of wires with flat connectors, (40028820, 40028819) to the **main switch (1)**, install the main switch and connect the wires to **the connection terminals (2)**.

L: Black (3)

N: Blue (3)

1: Black (4)

2: Blue (4)

Install and connect **the new fans (1)** (10023154).

Remove **the screws (1)** from the HRW cover.

Remove **the belt (2)** from the wheel.
Remove **the screws (3)** from the motor package.
Remove **the ground wire (4)**.

Remove **the motor package**.
Cut **a gap for the new motor cable (5)**.
Check that **the brush clips (6)** are in place.

Install **the new motor package (2)** (40028738).

If the unit is manufactured before 1.3.2008, new holes for the new motor package needs to be drilled.

Check that **the brush clips (1)** are in place.

Install the HRW cover.

Connect **the new display cable (3)** to the main board. *The old display cable may also be used, but the joints has to be done carefully and in a proper way. Close the cover to the electrical box.*

Install **the new display (40031114)** in a desired place.

Install **the WiFi module (1)** (40034288).

Install **the new type plate sticker (2)**.

Install and connect **the HRW (3)**.

Install **the filters (4)**.

Press down **the main switch (5)** and perform insulation and ground continuity test according to regulations.

MANDATORY PARTS

10024020	CONTROL UPDATE KIT LTR6 ACE/ECE → EAIR E	1
