

# THE INSTALLERS DREAM

**”After all, the units are never difficult to install, but if it can get even easier, I’m interested.”**

# Enervent Alta

LIKE A GIFT FOR THE INSTALLER

Enervent Alta is designed to be particularly easy to install. Due to its design and low noise level, it doesn't need its own technical space. Installers love it!

## WHEN INSTALLERS GET TO CHOOSE

Enervent Alta's inventive design makes it extremely easy to install. Because the power cord, control panel cable and cooker hood indication cable are brought out of the unit at the factory, there is no need to open the unit when installing it.

## **CAN YOU HEAR IT? IT IS REALLY QUIET.**

Enervent Alta is easy to place, not only because its shape, but also because of its low noise level. For this device you do not need a separate technical space or closet.

You can install it for example in a false ceiling in the living quarters.

## READY FOR THE KITCHEN

Alta is ready to be connected to the cooker hood in the kitchen. No separate extract air duct is needed and you will save space where it is never enough.

Possible to install in the ceiling with the hatch downwards (965x450x362 mm)

Maximum air flow 313 m<sup>3</sup>/h (100 Pa)

Cooker hood connection

Casing zinc coated steel sheet, hatch painted white

Power cord, control panel cable and cooker hood indication cable outside unit

Class A EcoDesign 2018

**”I do not have a separate  
technical space for a  
ventilation unit.”**

*With Enervent Alta there is no need.*

**”Is it on yet?  
I can’t hear it.”**

*Enervent Alta can be installed in living quarters, due to its low noise level.*

Easy to install. No need to open during installation.

The unit has low noise level. Can be installed in living quarters.

With cooker hood connection.

**Enervent Alta – the installers dream.**
