### 4.2 System requirements

The App will not be accessible without a working Wi-Fi network communicating reliably with the Device. It is your responsibility to make sure the network and the Device are compatible with the App and that they are properly configured and secured.

## 5 LIMITATIONS TO THE USE OF THE APP

### 5.1 Use of the App

The App is intended to be used to review information about the System and to access and operate the System remotely. In order for all of the features of the App to function, the System must be connected to the internet through a working WLAN connection. You must not connect to any wireless network which you are not authorized to use while using the App.

In case internet connection is not available, or you do not provide your consent for the processing of your personal data for System analytics, facilitation of spare part purchases and System maintenance, System troubleshooting and System maintenance reminders, the App will only work locally on a point-to-point basis between the System and the Device.

The App does not provide access to any such settings of the System that are critical in order for the System to function as intended.

Check that the App is suitable for you. The App has not been developed to meet your individual requirements. Please check that the facilities and functions of the App meet your requirements.

### 5.2 Protocol

You are responsible for your use of the App. When using the App, you may not violate any law, statute or regulation or infringe upon any third party intellectual property, privacy, publicity or other

legal rights. Moreover, you may not transmit any viruses or other destructive items such as worms, Trojan horses and malicious scripts, or use automatic methods to use the App.

In particular, you warrant that you only use the App and the WLAN module of the System in countries where such use is in compliance with local laws, statutes and regulations. In case you have any doubts regarding compliance, please consult a local legal counsel for advice.

### 5.3 Availability of App

Although Enervent aims to keep the App constantly available, the App may be unavailable or interrupted from time to time for a variety of reasons beyond Enervent's control, such as Wi-Fi intermittency. Moreover, the App may be suspended temporarily due to security reasons, maintenance and repair, or other circumstances.

### 5.4 No life-safety or critical uses of the App

The data collected by the System ("System Data") may include inaccuracies or false information. The App, including System Data, cannot be used in hazardous environments or situations that require fail-safe performance, including without limitation in the operation of nuclear facilities, navigation or communication systems, weapon systems, life-support machines, or any other life-safety or other critical situations or emergencies. The App, including System Data, is not intended to be reliable or to constitute advice of any kind.

Enervent recommends that you back up any content and data used in connection with the App, to protect yourself in case of problems with the App.

You agree to use your independent judgement and use and rely on the App at your own risk.

## 6 GEOGRAPHIC AVAILABILITY OF THE APP

The App is intended, but not guaranteed, to be available for download in select European markets. Not all activities may be available in all markets, and you acknowledge that the availability of the App is also dependent on the third-party application store from which you download the App.

## 7 THIRD PARTY SERVICE PROVIDERS

Enervent uses cloud service providers (such as Amazon Web Services) to enable certain aspects of the App. Enervent collects data about the identification number, serial number, settings, malfunctions, maintenance and sensor data of the System to the cloud to be used for troubleshooting, maintenance reminders and product development of the Enervent ventilation systems. Enervent also collects information about the user of the App such as the name, e-mail address, address and phone number of the user to the cloud to be used to facilitate troubleshooting, maintenance, and spare part purchases.

Enervent strives to use reliable cloud service providers who provide sufficient guarantees for their compliance with data protection laws.

Further, Enervent will not be liable for damage that you could have avoided by following advice to apply an update offered to you free of charge or for damage that was caused by you failing to follow installation instructions correctly or to have in place the minimum system requirements advised by Enervent.

Some jurisdictions do not allow certain limitations of liability, in which case the above limitations shall only apply to the fullest extent possible under applicable law in such jurisdictions.
